Single: Transmittance for a single film

Parallel: Transmittance for a double film, axes parallel

Crossed: Transmittance for a double film, axes crossed

Vikuiti® Polarizer: HNP B

Type: Linear polarizer for near-ultraviolet

Features: Broad band polarizer (275 to 750 nanometers) for the near-ultraviolet as well as the visible region.

Typical applications: Photometric instruments, photography, microscopy, fluorescence.
