

## Linear Sheet Polariser

**Material / Specification:** HN22 - Visible grade/ 22% transmission  
**Range / Description:** POL-HN22

**Single:** Transmittance for a single film.  
**Parallel:** Transmittance for a double film, axis parallel  
**Crossed:** Transmittance for a double film, axis crossed

**Polariser:** HN22  
**Type:** Gray - green linear polariser.  
**Features:** For the visible spectrum and also for a portion of the near-infrared region. HN22 offers a very high extinction value of approximately 0.0009%.  
**Typical Applications:** Microscopes, sextants and optical instruments where extreme extinction is required.
