

Linear Sheet Polariser

Material / Specification: HN42 - Visible grade/ 42% transmission
Range / Description: POL-HN42

Singe: Transmittance for a single film.
 Parallel: Transmittance for a double film, axis parallel
 Crossed: Transmittance for a double film, axis crossed

Polariser: HN42
Type: Neutral linear polariser.
Features: High Transmission.
Typical Applications: Photographic, spectrographic and other applications where insertion losses must be kept to a minimum..
