

Circular Sheet Polariser

Material / Specification: HR - Infrared grade for 800-2000nm

Range / Description: POL-HR

Single: Transmittance for a single film.
 Parallel: Transmittance for a double film, axis parallel
 Crossed: Transmittance for a double film, axis crossed

Polariser: HR

Type: Linear polariser for near infrared.

Features: Broad band polariser for the region from 800 to 2000 nanometers.

Typical Applications: Shutter and light control devices for IR lasers, LED and other infrared sources, photodetectors in non-visible security systems, infrared photography and crystallographic studies.
