

## Linear Sheet Polariser

**Material / Specification:** HR - Infrared grade for 800-2000nm

**Range / Description:** POL-HR

Single: Transmittance for a single film.  
 Parallel: Transmittance for a double film, axis parallel  
 Crossed: Transmittance for a double film, axis crossed

**Polariser:** HR

**Type:** Linear polariser for near infrared.

**Features:** Broad band polariser for the region from 800 to 2000 nanometers.

**Typical Applications:** Shutter and light control devices for IR lasers, LED and other infrared sources, photodetectors in non-visible security systems, infrared photography and crystallographic studies.
